

# AEROSELL HYDRAULICS AND PNEUMATIC COMPANY

**ONE STOP QUALITY PRODUCTS.**

**WE ARE ASSEMBLERS OF  
AEROSELL HOSES AND PARKER HOSES**

- HOSE PIPE**
- PNEUMATICS**
- INSTRUMENTATION TUBE FITTINGS**
- ERMETO FITTINGS**
- HIGH PRESSURE VALVES**
- RUBBER SHEET**

## HYDRAULIC HOSE PIPE

Aerosell Hydraulics And Pneumatic Company started its journey more than 4 decades ago. We were one of the first people to start dealing in **High Pressure Hydraulic Hoses**, working with almost all Indian manufacturers as well as Importing from various world-renowned manufacturers from countries such as the United Kingdom, Germany, Italy, China, and others. We have a vast range of hydraulic hoses with working pressure up to 2500 bar.

Through constant effort, innovation, teamwork, and the use of cutting-edge technology, today we are one of the most reputable business houses, manufacturing, importing, and distributing a wide range of hoses.

## **INDUSTRIAL AND CHEMICAL HOSES**

Industrial flexible hoses are used to convey such media (substances, products) as fluids, gases and solids under pressure (delivery hoses) or under vacuum, in suction conditions (suction hoses). Compared to a permanent pipe installation (pipeline), they enable easy assembly, eliminate vibrations and installation movements. The flexible hoses are intended for various industrial applications at pressure ranging from low and medium up to several tens of bar. They are divided into a number of groups depending on application, hose material and construction.

WHEREAS CHEMICAL HOSE ARE USED INTO PHARMACEUTICALS APPLICATIONS SUCH AS PASSING OF HIGHLY ACIDIC FLUIDS.

## **SS FLEXIBLE HOSE**

SS flexible hose assemblies are often used where rubber, plastic, PTFE, or other types of hose ducts are unsuitable. Reinforced corrugated metal hose provides for the transfer of liquids or gases, and is engineered to handle extreme temperature and pressure. Metal hose may be appropriate where other types of hoses are not, such as the transfer of extremely high temperature liquids or gases or transferring extremely cold (cryogenic) liquids

Aerosell Hydraulics and Pneumatic Company is committed to serving our customers with the largest selection of hoses and materials in the corrugated metal hose industry. Whether we are designing specialty hose assemblies for OEM applications or supporting our network of distributors, Aerosell Hydraulics and Pneumatic Company has the dedication and resources to meet the needs of today's industrial requirements

Every single Aerosell Hydraulics and Pneumatic Company corrugated metal hose assembly is tested for leak integrity.

## **RUBBER AND SS EXPANSION BELLOW**

Aerosell Hydraulics and Pneumatic Company designs and manufactures corrugated expansion joints from the simplest standard expansion joints to highly complex expansion joints which are designed especially based on Individual customer requirements. Corrugated expansion joints are single or multi-layered stainless-steel expansion joints with a high level of expansion absorption and a low spring rate. They are used as flexible pipe connections in mechanical engineering, power unit and pipeline construction, in district heating and exhaust pipes as well as in industrial and sprinkler systems.

We Manufacture SS Expansion Bellow in SS 304, SS 316, And SS 321. All Bellows are tested before delivery.

## **SILICONE AND PVC HOSES**

Silicone tubing is a tough elastomer with high strength, flexibility, and resistance. Silicone tubing can be stretched without tearing and is highly versatile. It cannot be weakened with repeated bending and twisting due to its significant flexibility. Because silicone tubing is very hygienic and non-toxic, it can be produced as a medical-grade material, making it a popular choice for healthcare and medical applications.

Silicone has properties that allow it to work well over a broad range of temperatures and adapt easily to sudden changes in weather and temperature. Silicone tubing has a major role in a variety of industries and applications involving the transfer of liquids and gasses. It has a fantastic range of properties that make it the preferred material for tubing in many situations.

We are as industrial hose manufacturers, customers can avail industrial hoses in different materials like plastic, rubber, PTFE, stainless steel, etc. Some of these industrial hoses are designed for light duty commercial applications such as foundries, vacuum cleaners etc.

## **THERMOPLASTIC HOSES**

Thermoplastic hose are high pressure and temperature sustaining hose which come in wire as well as nylon braiding. It has a layer of ptfе in the tube which makes it a unique product. These hoses are used in oil, water, sewer industries, paints, air, grease, acids and many more.

## **LOW PRESSURE HOSES**

Textile braided low pressure hydraulic hose is commonly applied to suction and return line, anti-static delivery line, and vacuum applications for petroleum and water-based hydraulic fluids, especially where tight routing is urgently required. It is also including return hoses, lube lines and air lines without brake applications.

## **FOOD GRADE HOSE AND BREWERY HOSE**

Food-grade hoses allow the clean and secure transfer of liquid and dry bulk food materials. Since they contact food products, the hose material needs to be correct for the application to prevent any foreign substance leakage into the food products moving through them. Therefore, the hose must meet specific standards to prevent deterioration that could cause food quality, smell characteristics, purity, or taste issues. The food-grade hoses are designed not to add odors to products, contamination, or flavors to the conveyed material, nor does it absorb odors. This helps keep the taste and aroma of the final product intact.

## **OXYGEN AND NITROGEN FILLING HOSES**

These are high pressure and temperature sustaining hoses used in filling of cryogenic gases and liquids. These hoses are amazingly flexible hose covered with SS 304 braiding and can come with leashing guards for safety purposes.

## **PTFE HOSES AND FABRICATION**

Polytetrafluoroethylene, or PTFE for short, is one of the common names for Teflon. PTFE hose is used in stainless steel hose so the hose lasts much longer than rubber hose or rubber encased in stainless steel. It has many benefits over rubber products. This type of hose resists all types of fluids and chemicals, including gas, ethanol, transmission fluid, brake fluid, power steering fluid and antifreeze.

## **MINIMESS HOSE**

Minimess hoses are microbore hoses that come in the standard lengths of DN2. Max working pressure 630 bar. Same fittings or different fittings on both sides. These hoses are testing hoses mostly attached to a pressure gauge.

# HYDRAULIC FITTINGS

We Aerosell Hydraulics and Pneumatic Company have vast range of fittings.

We Manufacture All kind of fittings in MS ,SS and Brass.

## Types of Fittings:

**Hydraulic Hose Fitting:** These are mostly fittings crimped on hose pipe which can be differentiated by male and female type. The common threading used are BSP, BSPT, NPT, METRIC, UNE JIC, etc.

**QRC:** QRC is short name of Quick release couplings or Quick disconnecting couplings or Quick couplings.

**Camlock:** Camlock fittings are a type of hose coupling. This means that they are a way to connect or disconnect a hose or pipe in a speedy, efficient way without having to involve complex tools or equipment.

**Adaptors:** Hydraulic adaptors are used to connect hydraulic hoses and pipes to pumps, valves, hydraulic cylinders and other parts of the hydraulic system.

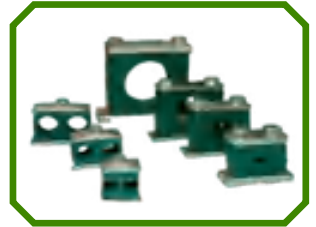

**NRV:** Non Return valve is used to ensure unidirectional flow of fluids. This valve is Self Operated valve and doesn't require any hand wheel or gear for operation. It is available in variety of size, rating and design.

# CERTIFICATES

**MQA Certification**  
Certificate of Compliance

This is to certify that  
**AEROSSELL HYDRAULICS & PNEUMATIC COMPANY**  
FLR-4, PLOT-24, 6, RANDBHERI BUILDING, NAGDEVJI LANE, OFF ABDUL REHMAN STREET, MUMBAI, MUMBAI, MAHARASHTRA, 400019 INDIA  
Has been assessed and certified by MQA Certification Services  
As meeting the requirements of:

**UL**  
(UNDERWRITERS LABORATORIES)

For the Following Scope of Activities:-  
IMPORTERS / EXPORTERS AND MANUFACTURERS / ASSEMBLERS OF HYDRAULICS HOSES AND END FITTING, SS SPRINKLER FLEXIBLE HOSES, RAINDROPE SS FLEXIBLE HOSES, TEFロン HOSES, SS FLEXIBLE HOSES, VALVES, HYDRAULIC FITTING SS AND MS ALL TYPES

:: Certificate No :: **UL/24M06568**  
Date of initial registration: **23 December 2024**  
First Surveillance Audit on or before: **22 December 2025**  
Second Surveillance Audit on or before: **22 December 2026**  
Re-certification Due: **22 December 2027**

This Certificate is property of MQA and remains valid Subject to satisfactory surveillance audits.

Authorized Signatory  
MQA CERTIFICATION SERVICES  
115, The Arcade, 9th, 10th, 11th, London  
SW8 5EJ, United Kingdom

UL  
UKAP-0941

To check validity of the certificate please visit at [www.mqacertification.com](http://www.mqacertification.com)

This certificate is issued in compliance with the requirements of the ISO 9001:2015. The certificate remains the property of MQA. Certification services are provided on a non-guaranteed basis.

**CERTIFICATE**  
This is to Certify that the Management System of

**AEROSSELL HYDRAULICS & PNEUMATIC COMPANY**  
FLR-4, PLOT-24, 6, RANDBHERI BUILDING, NAGDEVJI LANE  
OFF ABDUL REHMAN STREET, MUMBAI, MUMBAI  
MAHARASHTRA, 400019 INDIA

Has been assessed and found to be in compliance with the requirements of the standard

**ISO 14001:2015**  
Environmental Management System

This certificate is valid for the following products or service range

IMPORTERS / EXPORTERS AND MANUFACTURERS / ASSEMBLERS OF HYDRAULICS HOSES AND END FITTING, RAINDROPE FLEXIBLE HOSES, TEFロン HOSES, VALVES, HYDRAULIC FITTING.

The validity of certificate is subject to regular surveillance audits and is to be renewed before the mentioned dates and it is only valid after successful surveillance with continuation letter issued by USPL.

Initial Date of Certification : 21/12/2024      Current Date of Certification : 21/12/2024  
Date of Expiry : 20/12/2027      1st Surveillance Audit      Certification Number :
